19 - Which characteristics of Yanssel Garcia or course have been most valuable to your learning experience? -

Response Rate	9/18 (50%)
<ul style="list-style-type: none"> • He was very helpful in answering questions when asked. He was very up front and real about the difficulty and expectations of this course. His feedback was exceptional and very helpful in both this course and other courses. • He was a very engaging professor and you can tell that he cares about the information he is presenting. 10/10 recommend to any student • Professor Garcia is one of those rare professors that has a passionate love for the work he does. He consistently provided interesting and thought provoking ideas all throughout the spring semester. He is without a doubt one of the best professors at this university. He is a kind and stern man who has elevated my writing and logical thinking to another level. • I really enjoyed the way he has taught this class. He is very intelligent and knowledges about everything he is talking about and takes his time to explain topics to make sure we understand everything as well. • Dr. Garcia was very enthusiastic about the field of philosophy. I was unsure what I was getting myself into before selecting this class, but I am glad that I did. I would have described myself as an excellent writer before taking his "Meaning of Life" class, however after completing this class, I would say that I am now an exceptional writer. I think that philosophy is often misunderstood and the values learned in this field of study are often invaluable. • Knowledge about the topics at hand as well as simplification to make difficult theories understandable for an intro class. • I like how this course was organized and also the assignments . I like when he gives examples of each topic that is discuss in class. • He's patient, kind and generous. • His ability to explain such difficult topics in an easy to follow yet thorough manner, while also inserting bouts of good humor, was unlike any other professor I've had. His teaching style is simply the model of what every other professor should strive for. 	

20 - Which characteristics of Yanssel Garcia or course are most important for him/her to improve upon? (particularly aspects not covered by the rating items) -

Response Rate	9/18 (50%)
<ul style="list-style-type: none"> • More dynamic teaching styles (group work, activities, handouts, etc.) • At first the class was not as discussion based but throughout the semester he improved and added more discussion which helped understanding of the course material. Other than that there is no improvements I can give to him. • nothing. • I think he ran this class very well and i wish that all my professors were like him. Although it was challenging he cares and is passionate about what he does • The only thing that I think Dr. Garcia needs to work on is the amount of discussion that he implements throughout the course. I think that he did a great job implementing discussions towards the middle of the class and that made the class layout much more beneficial. Overall, an exceptional professor and this happened to be one of my favorite classes I took as an undergraduate student. • A bit of a harsh grader when it comes to essays, and the essays take a huge percentage of the grade which might result in a lot of people losing grades. • I would like to see more group discussions • Explaining the topics more broadly. • I think very few students, across any major/area of study, will confirm that they read much of the out of class assigned literature. In particular, Professor Garcia does such a great job of explaining in class, that there is little need to do anything other that pay close attention while there. To this, I would either trash many of the readings, or assign a quiz or some sort of learning activity that specifically engages in those readings. For me, many of those readings were just collecting dust within Canvas, yet I was able to achieve a high grade in the class solely off the lectures.

19 - Which characteristics of Yanssel Garcia or course have been most valuable to your learning experience? -

Response Rate	15/20 (75%)
----------------------	-------------

- Time management and taking advantage of asking questions when I don't understand. Also how to conduct a strong argument.
- I think that Professor Yanssel really taught this class perfectly. The energy he brought and the genuine enthusiasm he has about philosophy made me so much more engaged during classes. I also really really liked that he did not have presentations made for each class period, but rather provided students with a handout on canvas to follow along, and would use the whiteboard during class. I retained the information a lot better this way, rather than when professors just make a slideshow and read verbatim what it says and let that be the whole class. When classes are set up like that, it minimizes the desire to go to class when I could lay in my bed and get the exact same benefit of actually going. With this, sorry for going on a whole tangent, I think Professor Yanssel teaches this course in an exceptional way, and while I am only a sophomore at UNO, can 100% say that he is the best professor I have ever had in a class, and that I absolutely LOVE the way he teaches this course. (I know these things are confidential but I feel like if I was a professor I would want to know which students I had a good impact on so hi this is Hailey Matthews haha) !!
- Yanssel Garcia is very available when someone needs his help.
- He was humorous and showed passion for his work. He is very educated about each topic he discussed and I learned very much from his course.
- Making the classes fun by having group discussions and by cracking jokes once in a while
- The passion he put into his lectures.
- I believe his enthusiasm towards this course made the class especially interesting. His way of explain was very understanding and was organized well enough to understand it very well. His feedback was raw and honest which helped with the essays we were assigned and all the material he had was organized as well, which made it easy to navigate through canvas.
- Very helpful when I needed advice. He is motivated and knowledgeable of the material.
- He was a professor who tracked me down and found me outside of class so that he could get me invested again and went over ways I could improve my grade and pass the class.
- His humor and knowledge of many things kept the class interesting. He was able to say things in a way I could understand and would explain things in greater detail if it was requested.
- The lectures were stimulating and encouraged us to keep up by asking us to participate with our own thoughts. It was also really helpful that each lesson was flexible, meaning that I could ask a question or ask for clarification and Yanssel would spend an adequate amount of time answering and wasn't in a rush to hurry back to the lesson material. He was also incredibly generous with the time he gave us to complete assignments, and I really, really appreciated it.
- The most valuable thing I learn in the course would have to be all of the ideas and theories that philosophers put out. It truly makes you look at the world like it's a different place.
- He's a great lecturer. The lectures are engaging and thought-provoking. He uses a white board to highlight important information rather than using a mind-numbing PowerPoint. This is the best class I've taken at UNO.
- The most valuable characteristics Dr. Garcia has is that he is very passionate and well rounded in the topic. Great teachers are the ones who can inspire their students to continue to learn and grow. That is exactly what Dr. Garcia did! There is only a few amount of teachers that you can say are able to inspire students like that. Philosophy is a hard and vast topic, but the class was taught well. Additionally, I really liked the discussions in class because philosophy is a great topic to pinch and poke at with questions to understand better. Thank you so much!!! I loved this class.
- The way he taught the class was engaging and fun to listen to. He made me want to show up to class and hear what he had to say over such compelling arguments.

20 - Which characteristics of Yanssel Garcia or course are most important for him/her to improve upon? (particularly aspects not covered by the rating items) -

Response Rate	14/20 (70%)
----------------------	-------------

- Lectures continued to be long and very overwhelming at times. Maybe he could offer some classes to going through a reading together as a class, as some of the readings are hard to articulate.
- Nothing! The class is set up in a very organized and easy to follow way, especially with an extremely specific and dated syllabus. The course does not go too fast or too slow and, other than a few of the readings that took a while to get through, the course load outside of class was not too bad at all.
- The organization of lectures would need to improve. Some lectures were a bit difficult to understand.
- He could work on how the 3 papers are presented throughout the semester and the grading of them. Also, the rubrics are difficult to understand and it was difficult to know exactly what he wanted with his rubric and syllabus, when it came to the content wanted for the papers. I also believe for an introduction class he grades a bit harshly and might go in depth too much on certain topics instead of just "introducing them".
- Nothing
- N/A
- I don't see any necessary improvement I think he is a great professor and is passionate in what he does, it is visible.
- Give him a little time and he'll continue to grow as he's constantly trying out new things, but he's an amazing professor.
- I think it was a great course and cant think of anything. Maybe more depth into theories but I also understand its an introduction course so its probably just right.
- My only request is that the readings be shortened, but I've never liked doing the readings for anything anyways.
- Nothing. I think he is a great and fair professor. The syllabus is as followed, assignments were straight forward, 2-3 weeks were given to work on writing assignments which is more than enough time, and class was always filled with new topics and ideas. You should give him a financial raise.
- Although the syllabus has dates and what's happening in each class period, I think it would be useful if it was more clear whether the material was supposed to be read/watched prior to the class period. I think that would make in-class discussions and discussion posts better. It was only made clear that readings/viewings were to be done before class started every so often.
- N/A
- How strict he was on the papers. The papers were extremely hard to write due to all the theories and philosophers, alongside how many viewpoints he taught. Very beneficial, just hard to keep up at times.
